

Felipe Barclay

Digital Designer

Buenos Aires, Argentina | fbarclay@mail.utdt.edu | +54 9 11 4095-3333 | felipebarclay-create.github.io

Profile

Digital Designer with a background in Design & Innovation, focused on digital products, websites and visual identity. I enjoy understanding complex problems, collaborating with multidisciplinary teams and transforming insights into thoughtful, functional solutions — from early research and user flows through to polished UI, brand systems and final assets. Always motivated by curiosity and continuous learning, I aim to create designs that deliver meaningful value for both users and businesses.

Experience

Melancia Marketing — Jr. Designer | 2022 – 2023

- Managed content across 7+ Instagram accounts, publishing 5–10 posts and stories per day for multiple clients.
- Worked on email marketing and contributed to various ad campaigns.
- Grew audience engagement, follower count and reach across managed accounts by designing visuals focused on brand consistency and audience response.

Cavalier Polo — Graphic Designer | 2025 – 2026

- Designed team logos, brand systems and custom team apparel for 190+ international clients, contributing to over \$120,000 USD in sales.
- Collaborated directly with international clients to translate business needs into effective visual design solutions for the team across several high-profile international tournaments.
- Worked on-site, 45h/week, managing multiple concurrent projects in a fast-paced, high-pressure environment driven by peak-season demand and tight turnarounds, while maintaining consistent quality, communication and client satisfaction.

Independent — Digital Designer | 2023 – 2026

- Independently designed and shipped 3 end-to-end projects — a client website (Lake Poopó), plus a self-directed brand identity & website (Puzzles) and a self-directed B2B SaaS concept (MediFlow) — covering everything from research to final UI.
- Owned the full design process per project — research, wireframing, prototyping and visual identity through to final UI — balancing client work with self-directed concepts.
- Delivered visual identities and digital assets alongside product work, covering brand and web needs across both client and self-directed projects.

Education

St John's School — International Baccalaureate (IB) Diploma & High School Diploma | 2014 – 2020

Universidad Torcuato Di Tella — Bachelor's Degree in Design & Innovation | 2020 – 2025

Interdisciplinary design program combining product, digital and visual design through research, creativity and innovation.

Skills

Figma — Advanced • Adobe Suite (Ai / Ps / Ae) — Advanced • Adobe Firefly — Working knowledge • Notion — Advanced • Blender — Proficient

Claude — Advanced • ChatGPT — Advanced • Framer — Advanced • v0 — Proficient • Cursor — Working knowledge

AI is used to accelerate research, exploration and prototyping, while design decisions, strategy and creative direction remain human-led.
